

Portfolio

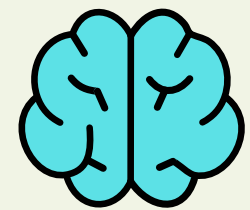

Data Analyst

This portfolio is intended for job applications,
with a strong focus on data-driven business growth.

Raihan Adi Pramudya

Mindset & Objectives

Portfolio

Mindset & Objectives

Primary Objective

Building a personal brand as a professional data analyst to support full-time job applications and effectively showcase specialized expertise.

role

Data Analyst

Key Value Proposition

"Capable of transforming raw data into actionable business insights through intuitive and effective data visualization."

Portfolio Type

End-to-End Analysis
(Case Study Based)

Alasan Pemilihan

This type is selected because the target role (Data Analyst) strongly emphasizes the ability to solve problems end-to-end—from data cleaning to delivering clear and actionable business conclusions.

| About Me

Hello, I am Raihan Adi Pramudya

I am a data analyst with a strong passion for solving complex problems through data. Based on my experience, I am proficient in data cleaning, data visualization, generating business insights, and problem-solving. These capabilities are supported by my proficiency in tools such as Python, SQL, Excel, and Tableau/Power BI.

I view data as a reliable foundation for uncovering insights and addressing business challenges effectively. My goal is to help organizations make data-driven decisions that are both strategic and practical.

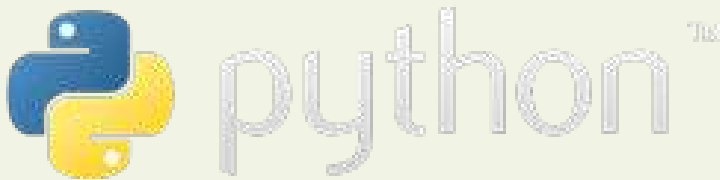

Focused on data-driven business growth.

SKILL/TOOLS

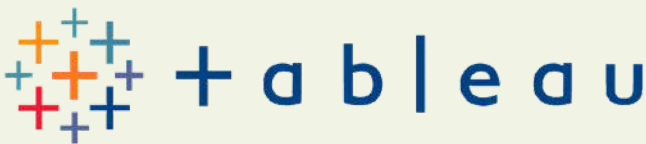

Excel

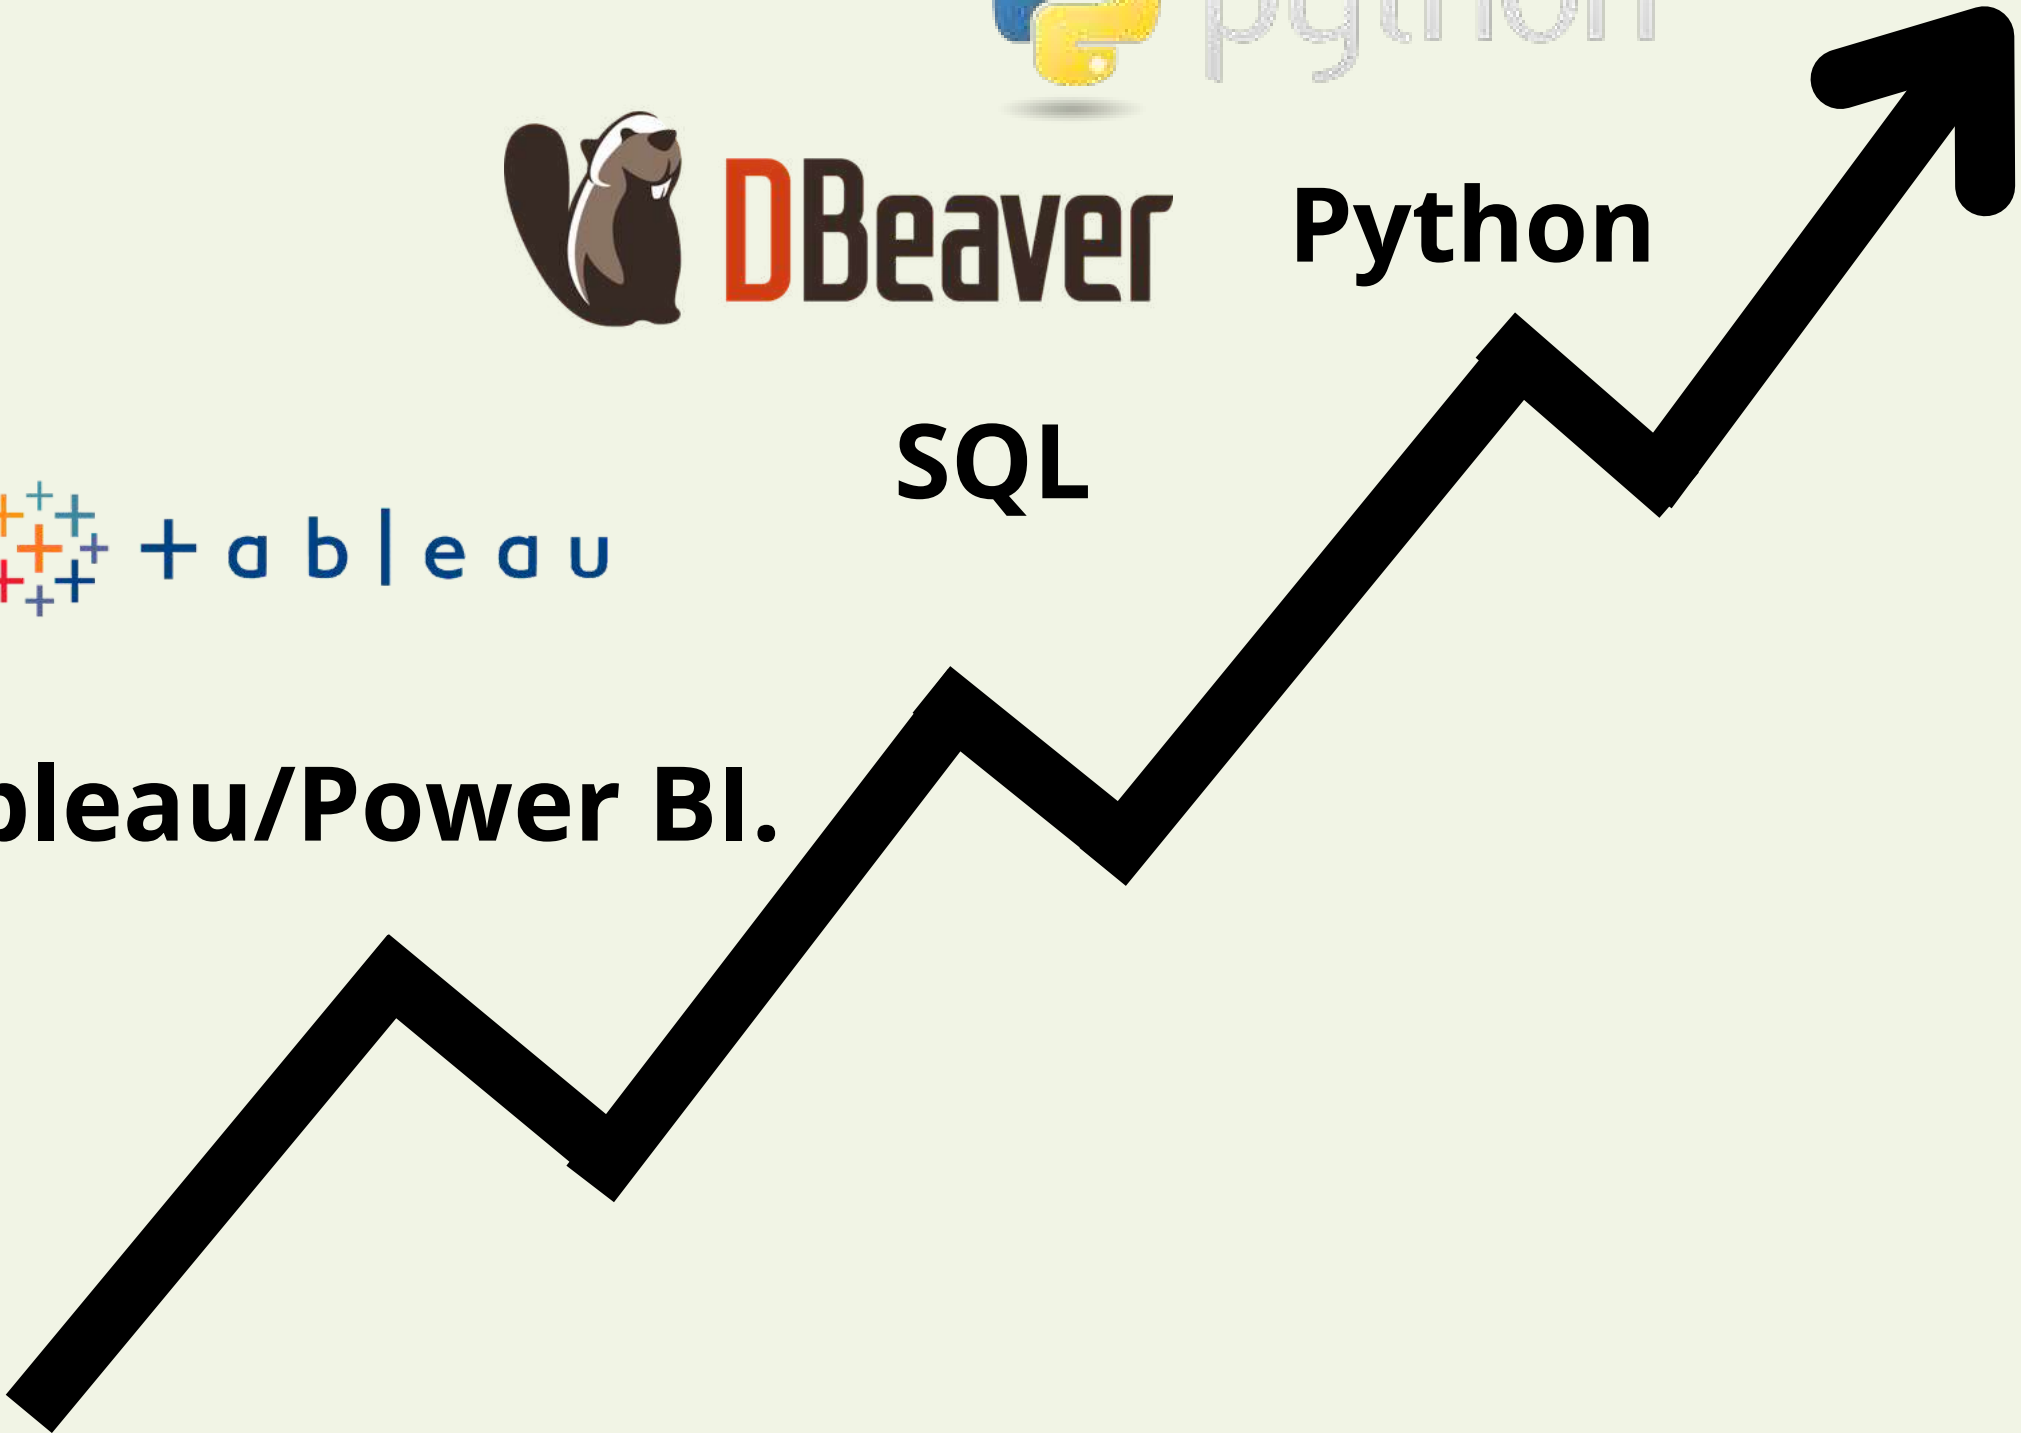

Python

SQL

Tableau/Power BI.

Sheet1

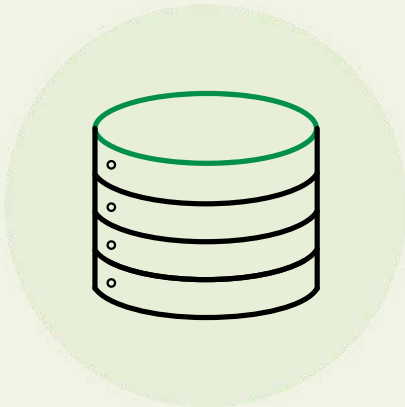

Business Problem

The horticulture business is experiencing fluctuating sales performance across different products and time periods. However, the company lacks clear insights into which products contribute the most to revenue, which items underperform, and what factors influence these variations.

Without data-driven analysis, it is difficult for the business to optimize product strategy, manage inventory effectively, and maximize overall revenue.

DATA UNDERSTANDING

Horticultural Sales Revenue Dataset

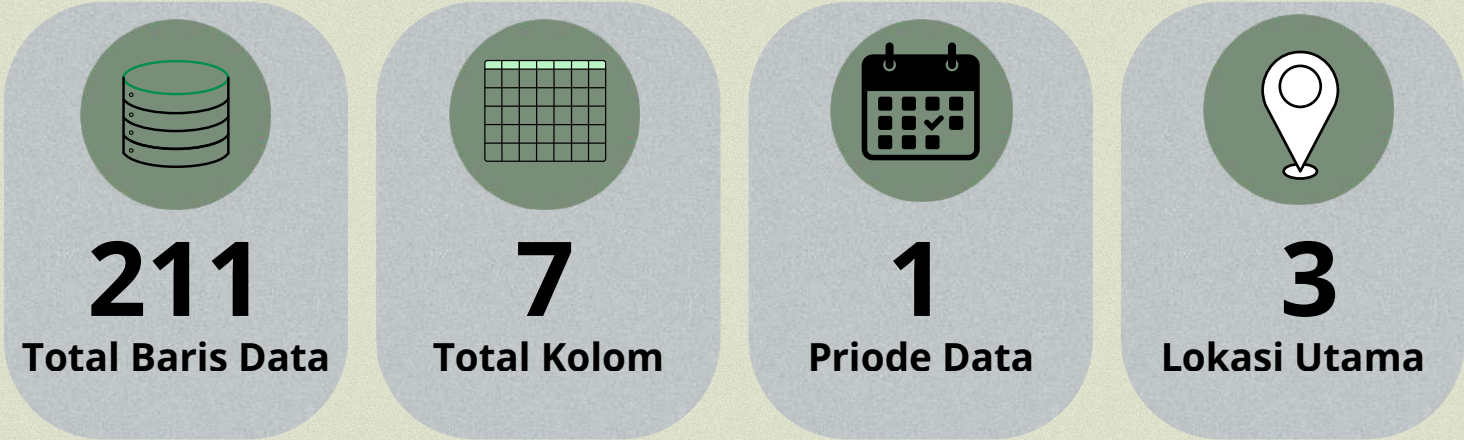

This dataset contains sales data of horticultural products across various regions and locations in Jakarta within a specific period. The data includes information related to commodity types, sales volume, product units, and the total revenue generated.

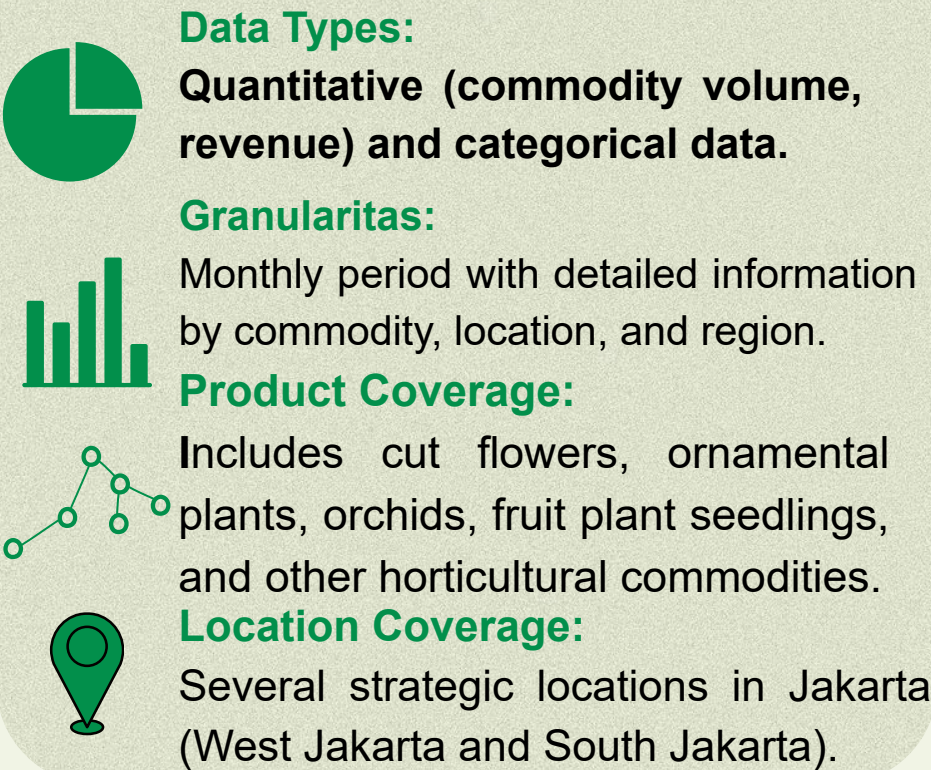

DATA STRUCTURE

	Variabel	Tipe Data	Deskripsi	Omzet
	Priode Data	Numerik	Menunjukkan Priode Tertentu	202512
	Wilayah	Kategorikal	Wilayah Administratif Penjualan	Kota ADM. Jakarta Timur
	Lokasi	Kategorikal	Tempat Penjualan	Pasar Bunga Rawa Belong
	Jenis Komoditi	Kategorikal	Nama Produk yang Dijual	Mawar Tabur
	Volume Komoditi	Numerik	Jumlah Produk yang Terjual	955
	Satuan Komoditi	Kategorikal	Satuan Produk yang Dijual	Ikat
	Omzet	Numerik	Total Nilai Penjualan	21405000

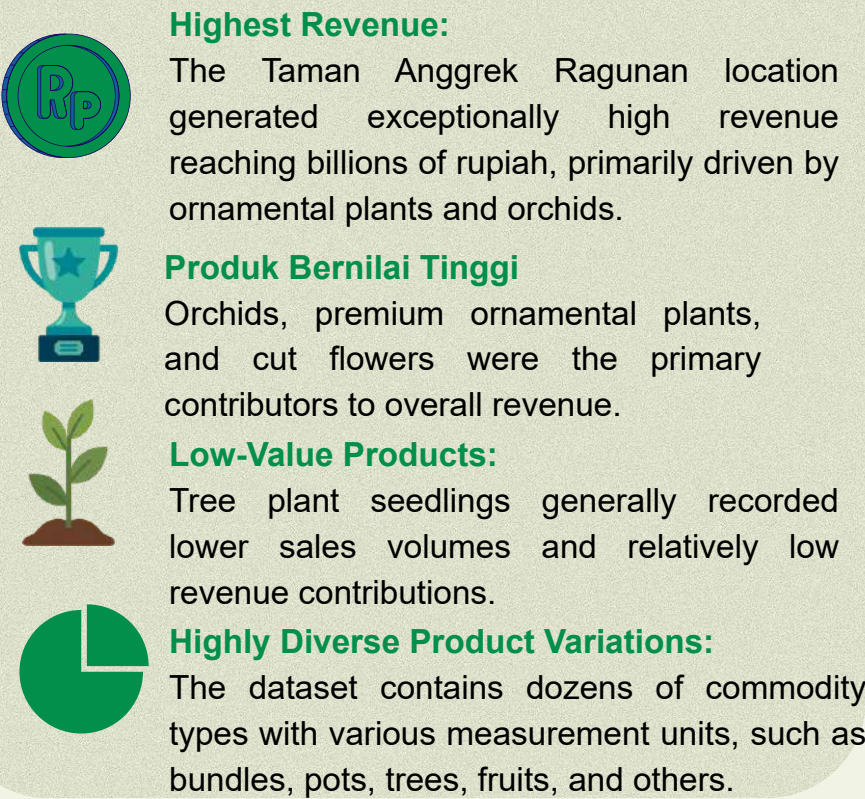

RINGKASAN DATA SET

DATA CHARACTERISTICS

INSIGHT AWAL

4. Data Quality Assessment

- Inconsistent measurement units (bundles, pots, trees, fruits, etc.)
- Non-standardized commodity naming conventions
- Presence of revenue outliers (extremely high vs. very low values)
- Differences in product granularity (premium vs. mass-market products)

5. Data Preparation Needs

- Standardization of commodity names
- Product categorization (flowers, ornamental plants, seedlings)
- Unit normalization (if required)
- Validation of revenue calculations: $\text{revenue} = \text{volume} \times \text{price}$

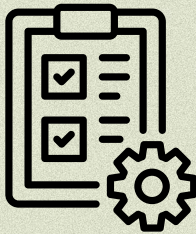

6. Analytical Potential

- Which products contribute the highest revenue?
- Which locations are the most profitable?
- What are the performance differences across regions?
- How is revenue distributed across product categories?

DATA CLEANING

Data cleaning process to ensure accurate and consistent data before analysis.

OBJECTIVE

Improved data quality by identifying and handling missing values and duplicate records, correcting invalid data types, and standardizing the dataset to ensure readiness for analysis.

LANGKAH DATA CLEANING

HANDLING MISSING VALUES

- Identifying missing values
- Filling or removing irrelevant missing data

REMOVING DUPLICATES

- Identifying duplicate records
- Removing exact duplicate data entries

REMOVING DUPLICATES

- Standardizing text formatting
- Standardizing commodity measurement units
- Converting the period format into YYYYMM

BEFORE DATA CLEANING

	periode_data	wilayah	lokasi
0	202402	Jakarta Timur	Sentra Promosi Bunga Klender
1	202402	Jakarta Timur	Sentra Promosi Bunga Klender
2	202402	Jakarta Timur	Sentra Promosi Bunga Klender
3	202402	Jakarta Timur	Sentra Promosi Bunga Klender
4	202402	Jakarta Timur	Sentra Promosi Bunga Klender

- Incorrect data types identified in periode_data, volume_komoditi, and omzet
- Inconsistent formatting in region and location names (uppercase, lowercase, and excessive spacing issues)

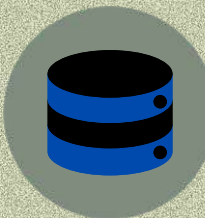

AFTER DATA CLEANING

	periode_data	wilayah	lokasi
0	2024-02	JAKARTA TIMUR	SENTRA PROMOSI BUNGA KLENDER
1	2024-02	JAKARTA TIMUR	SENTRA PROMOSI BUNGA KLENDER

ANALYSIS PROCESS

The analysis process was conducted in stages to understand horticultural sales patterns, identify trends, and uncover insights that support business decision-making.

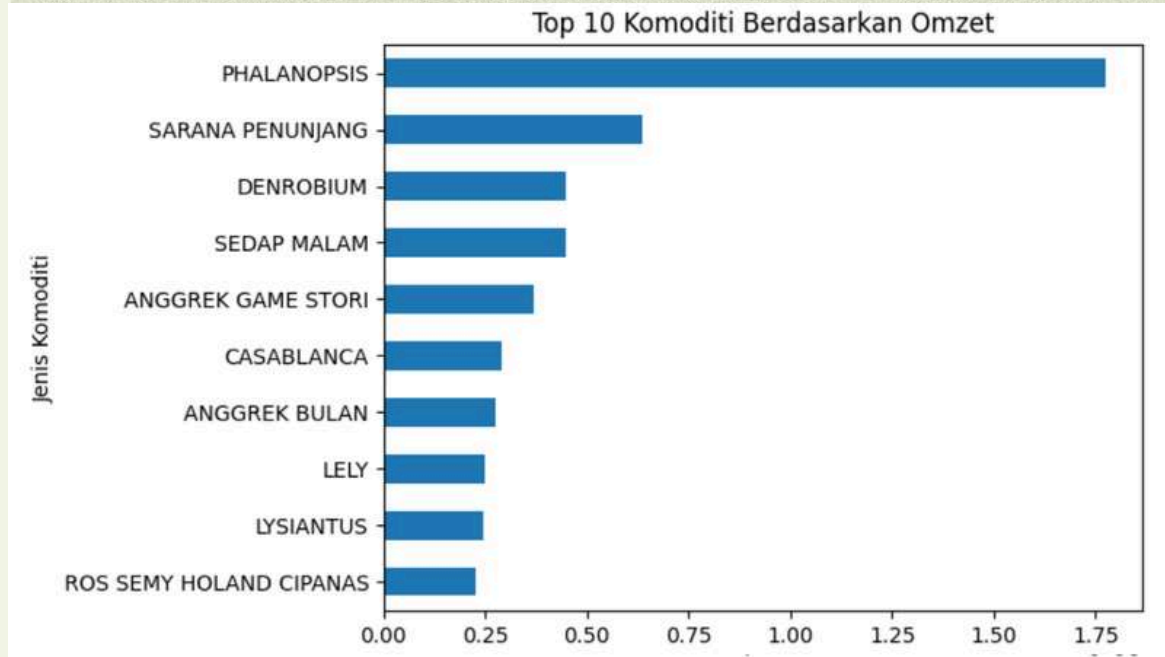

**TOOLS**

**EXPLORATORY DATA ANALYSIS**

Top Revenue-Generating Products:

- PHALANOPSIS (highly dominant)
- SARANA PENUNJANG
- DENROBIUM
- SEDAP MALAM

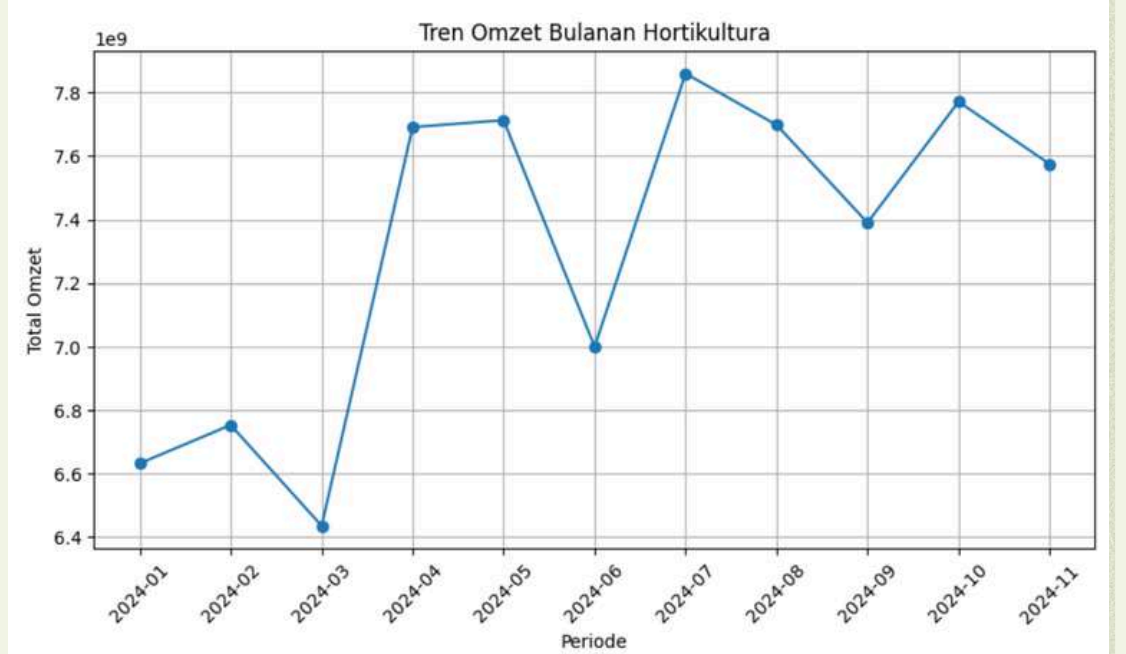

**TREND ANALYSIS**

Revenue declines occurred in:

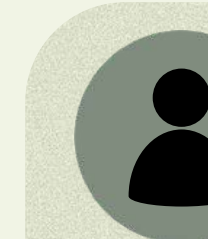

- March 2024
- June 2024
- September 2024

Revenue peaks occurred in:

- July 2024
- October 2024

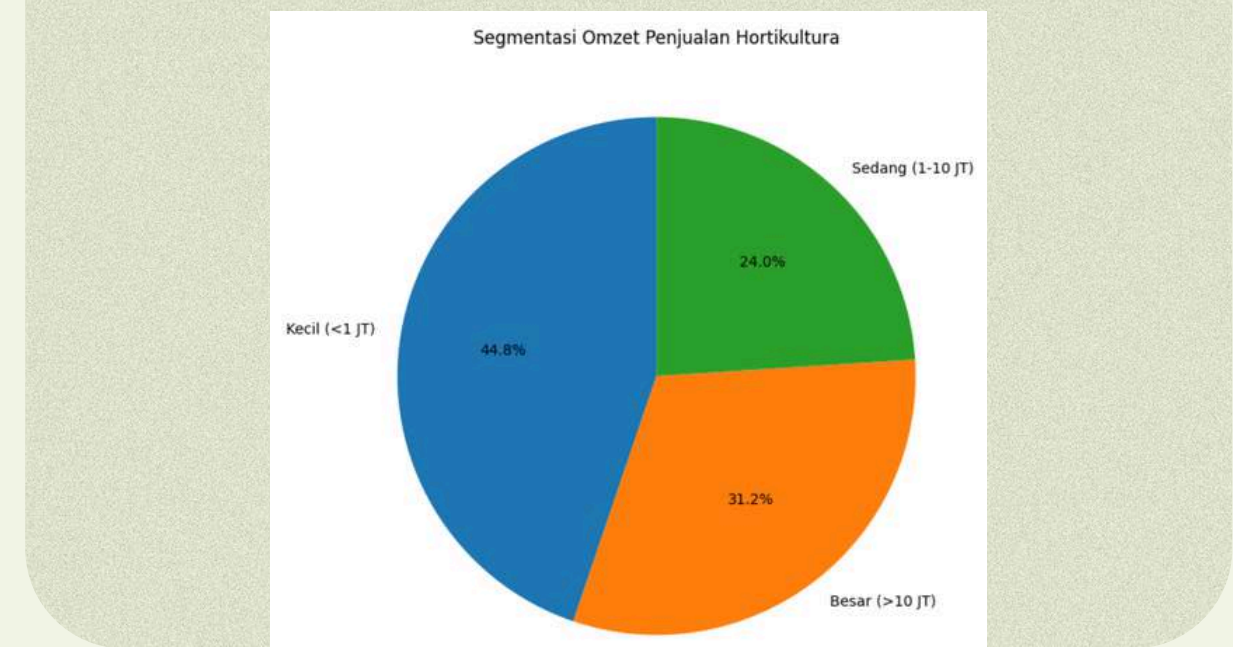

Periode	Total Omzet (1e9)
2024-01	6.65
2024-02	6.75
2024-03	6.45
2024-04	7.70
2024-05	7.72
2024-06	7.00
2024-07	7.85
2024-08	7.70
2024-09	7.40
2024-10	7.78
2024-11	7.58

**CUSTOMER BUYER BEHAVIOR ANALYSIS**

Based on the revenue segmentation analysis:

- Small category (< IDR 1 million) dominated with 44.8%
- Large category (> IDR 10 million) accounted for 31.2%
- Medium category (IDR 1–10 million) contributed 24.0%

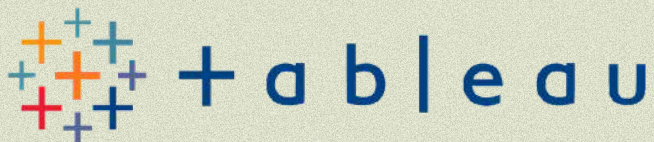

Kategori	Persentase
Kecil (<1 JT)	44.8%
Sedang (1-10 JT)	24.0%
Besar (>10 JT)	31.2%

KEY INSIGHTS

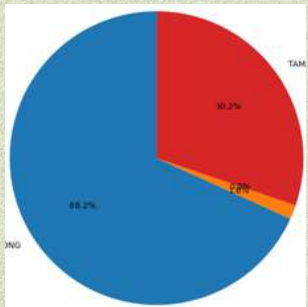

Insghts utama dari data omzet penjualan hortikultura

Based on the analysis of 211 horticultural sales records across several regions in Jakarta during the December 2025 period, the following key insights can support strategic business decision-making.

KONTRIBUSI OMZET TERBESAR BERASAL DARI BUNGA RAWABELONG

Pasar Bunga Rawabelong was the primary revenue contributor, accounting for 68.2% of the total overall revenue.

- PASAR BUNGA RAWABELONG 68,2%
- PENANGKAR BIBIT RAGUNAN 1,6%
- SENTRA PROMOSI BUNGA KLENDER 0%
- TAMAN ANGGREK RAGUNAN 30,2%

Fokus penguatan strategi penjualan di pasar bunga rawabelong berpotensi untuk meningkatkan omzet secara signifikan

TANAMAN PHALANOPSIS PRODUK DENGAN OMZET TERTINGGI

Phalaenopsis plants generated the highest revenue, reaching IDR 1.75 billion from the total overall product revenue.

Produk Phalanopsis menjadi motor utama penjualan, perlu dipertahankan dan dikembangkan

PENJUALAN HORTIKULTURA TERUS MENGALAMI PENINGKATAN SETIAP TAHUN

Horticultural sales showed significant growth starting from March 2024, followed by relatively stable sales performance between August and November 2024.

Penjualan pada November 2024 menunjukkan penutupan yang terus meningkat, menjadi peluang untuk lebih sering melakukan promosi karena sudah terbanguninters mayarakatnya

PRODUK DENGAN OMZET RENDAH PERLU OPTIMASI

Several products recorded very low sales performance and require optimization strategies to increase consumer interest and improve sales potential.

Apel Miki	70000
Jambu Air Mawar	140000
Jambu Air King Rose	140000
Belimbing Wuluh	150000
Sengon	150000

Beberapa produk memiliki kontribusi omzet sangat kecil seperti Apel Miki, Jambu Air Mawar, Jambu Air King Rose dan Belimbing Wuluh dengan persentase kurang dari 1%
